If you have an itch for something more, would you recommend checking out the list of the best Android games? The good news is that you don't have to spend money to enjoy the best of Call of Duty action on your phone. The even better news is that the gameplay is top notch and you're going to feel familiar with the veterans of the series while remaining accessible for more casual players. Choose between 5v5 battles on your favorite CoD map or dive into battle royale mode with 100 people in one or three perspectives. CoD Mobile is perfect for quick games waiting by bus, subway or somewhere. A 5v5 match goes pretty fast because it has a lower points threshold than the full modern war experience. Controller support comes standard even when it sometimes feels like cheating, not only is this one of the best giveaways on the Play Store, it's the best shooter for Android. From different control schemes to ease of play, CoD Mobile is a surprisingly good Activision product. I haven't spent a dime on the time I've played and you don't even have to. Android's quintessential shooter experience, Call of Duty: Mobile is easily accessible to all while providing a lot of fun for CoD and FPS veterans. Pubg Mobile's main attraction is its massive PvP battle royale mode, which pits 100 players against each other on a huge island equipped with weapons, ammunition, tactical equipment and vehicles. Thanks to Tencent Games' continued addition of new content to the game, there are multiple maps and several arcade-style modes to choose from for short sessions. Like many similar games, there is a tiered progress ladder with free game passes and premium passes that offer more cosmetic rewards. Every 6-8 weeks, the game pass is reset. It's a fairly typical monetization method popularized by Fortnite, so it's not surprising to see it here. If you loved PUBG on PC, check pubgFor that battle royale experience. PUBG is considered by many to be the game that made the Battle Royale genre popular and is available on Android. It gets regular updates and sports combat passes. Different from the previous two shooters, Fortnite on Android is a complete package deal. This is not a mobile version of an existing game - Fortnite packs in the same action you'll find on a PC or console. You even get to keep your saved battle path progressing and work. Fortnite is one of the most popular games in the world, but it is on Android for a little while. But legal spats mean you have to sideload it to play and you've seen the game kick off from the play store. Samsung users can install it through the Galaxy Store. Here's a link to download epic games: Many have tried to copy fortnite formulas, some of which have been converted to varying degrees of success, but years later it is hard to remove the king. Fortnite is full of micro-transactions, from battle passes to cosmetics. That's exactly how it is on other platforms. This is the full version of the game, so if you go live (except for iOS and Mac), you can see all the updates and additions. So have it. Fortnite is launched from the Play Store, but if you want to play on your phone, you can still sideload the King of Battle Royale. Hyundai Strike Online offers a pure online FPS experience packed with many great quick match options. Earn experience as you play and level you up so you can unlock new game modes. There are six in total and include most of the standard fare you'd expect - free, team death matches, seek and destroy, and hardcore mode. In-game currency can be purchased via in-app purchases or earned daily rewards, crates, and generally kicking ass, and it can be spent on new weapons, armor, and accessories for your character. With more than 30 types of weapons that can be rented or purchased, there is a decent amount of customization available for kitting. Call of Duty: If mobile is not to your taste, you still want some great shooting action, then check out Modern Strike Online. This is another great shooter. Modern Strike Online packs tons of content, customization, and excellent progression for free titles. Mindustry is an incredible open-ended sandbox tower defense game that blows you away with the depth and level of customization available to players. In addition to strengthening defenses, you need to maintain your supply chain to provide resources to your locations and turrets. Campaign mode mines resources while defending against waves of highly aggressive enemies and fully supports custom multiplayer matches and map editors. It wasn't long after I started developing some medic strategies that worked for a while, but soon the AI enemies understood my tactics, bypassed my defenses and destroyed my base. The whole game is free to play.Or in-app purchases. A completely free game with strings, Mindustry is a very fun tower defense game that requires tons of strategies to conquer. Developed by SuperCell - famous or perhaps infamous, for Clash of Clans - Brawl Star is a fast-paced arena brawler, unlike most other games on the play store. It's a departure from the Clash of Clans universe, and instead allows players to team up in a MOBA game that differentiates themselves from the rest of the genre with a colorful, cartoony look backed by great gameplay variety. There are multiple game modes and rotate every few hours, so every time you log in to the app, the new game mode always plays. Each game lasts fast in less than 3 minutes, so it's perfect for bite-sized games. There are lots of things to unlock, leaderboards to conquer and cosmetics for brawlers. Here is a fun, fast-paced, easily digestible MOBA for the pleasure of your game. Brawl Stars is a fun time with a lot of variety to do and see and keep things interesting. As if Stranger Things itself is not enough of a nostalgia trip/throwback, Stranger Things: The Game is a surprisingly great game for what was primarily a marketing tool for the second season of the Netflix show. All characters, settings and themes from the source material are converted into pixel retro action adventure games similar to gameplay to the old Zeldas legend (especially link adventures). If other 2D adventure games try and use digital D pads for control, Stranger Things uses a simple tap control system that works well. The game is a good mix of puzzle solving and action, with your favorite characters from the show to unlock and add to your party. This game has amazing depth and everything feels perfect for a free game. The strange thing surprised you and it was the case with Stranger Things: The Game. This is an overall and completely free game without any ads or IAP. Ancestor is a fast-paced puzzle game mixed with side scrolling action runners. If you have the hope of going far in this game, you will need sharp reflexes and quick thinking. Play as a cloak hero you have to cross dangerous lands filled with traps and enemies - with the help of mysterious orbs to shoot all the lasers. As the game adapts to your skills and ups the difficulty as you go - solve quick puzzles and clear the way ahead by shooting down enemies - including boss fights. If you want to support developers, you can buy cosmetic upgrades for characters and laser orb, but you can also unlock all items by collecting in-app currency during gameplay. Gorgeous and addicting game, ancestors mix puzzles with side scrolling running action. Test your reflexes and puzzle solving skills and enjoy a great game while you're at it. Pokemon Go is still going strong with a healthy player base that catches everything. The first epidemic is dead, but it's stillTo see people playing Pokemon Go on buses and elsewhere in the city. It is very popular that you could be one of the millions who have already checked out the game or are still exploring your city for a rare discovery or a day of community events. Kudo to Noiantic to do it because it's a pandemic problem or people are stuck at home. Pokemon Go is the first game to lead location-based augmented reality games into the mainstream and remains the meatiest and most enjoyable of all the games we've seen. You can ever play the game without a single purchase, but if you want additional storage, egg incubators, etc., you need to fork out some money. It's a great game for the summer and head outside with friends, if, of course, you can do it safely. Pokemon Go is insanely popular for many reasons. Everyone get something different from it and it's the perfect summer pastime. Vainglory is one of the best multiplayer online battle arena (MOBA) games for mobile that offers cross-platform support. The game looks stunning and offers 120FPS for devices that support it. There are both casual and competitive play game modes, while blitz 3-on-3 games are available for fast 5-minute matches and have robust 5-on-5 modes that typically last up to 25 minutes. Featuring a growing roster of heroes to choose from and exciting action that you can play on the go, Vainglory is a solid game that you can play for free and is supported by in-app purchases. In my experience, the biggest problems with Vainglory are server stability, a slow and unpawning progression system, and terrible matchmaking. If you land on a solid team or get trampled before flashing, it's crap. Still, The Vine Laurie is the best MOBA on Android and it's a blast to play when things work properly. I've never stepped into a competitive environment because MOBA wasn't what I was looking for, but casual mode works for me. Vaing Laurie is a MOBA experience on Android that offers good gameplay for casual and sweaty players. Asphalt 9: Legend is the latest entry in this famous mobile racing game franchise and results in a lot of frantic arcade racing action that you will love. The asphalt series always skips all pretenses of realism - outside the photorealistic car rendering - providing an over-top, high-octane experience with every fixation. Players can unlock new rides and upgrades for your garage or car, or work their way through career mode taking on competition online in multiplayer. Incredibly sophisticated graphics and an excellent soundtrack make Asphalt 9 an adrenaline trip that you won't soon forget. Of course, there are regular Gameloft trappings, such as stamina meters and micro-transactions of in-game items (including refreshing stamina meters). Still, you can get by without spending cash, so from that standpoint, Asphalt 9 is a great free game. If you love cars, this is a great gameYou. Now, the legendary mobile racing franchise, Asphalt 9: Legend continues the high-powered supercar race you love. Odyssey is a beautiful game with simple controls and infinite playability. The game builds off of the physics introduced in Alto's Adventures, and the Odyssey feels very familiar, except to trade snowy mountain settings for something diverse that transitions from desert dunes to leafy temple sections. This game introduced some fun new gameplay mechanics such as hot air balloons, riding walls, throwing your characters into the air and dust devils. It all comes together to take the best part from the first game, link tricks, and new ways to explore the slopes and feel like a unique adventure. Alto's adventure was already a fun game, but the Odyssey goes a step further. Master the slopes using a variety of tricks as you hurt your way down. Tired of clan gameplay crashes, but still love the characters and worlds created by supercell people? Join or create clans and share cards and strategies with friends around the world. You will be forced to keep tweaking your deck by working with new cards so you have to adopt quick thinking and genuine strategies to win. This game has been around for a few years now, so new players are ranking up and unlocking the crushes and chests to unlock all the best troop cards and more. A new game from the Clash of Clans universe, Clash Royale asks you to build a deck of battle cards and take on other players in one-on-one combat. Sky Force Reloading is one of those pure games that is just an explosion to play. This is a Harken top-down shooter that returns to the classic retro genre with gorgeous graphics and challenging gameplay. Blast your way through 15 action-packed missions as you defeat enemies while fending off attacks that send them back your way. Collect stars and upgrade your ship as you try to win all the medals on each mission in each difficulty level. There are also plenty of skills to keep your eyes, unlock to find and unlock. This is an incredibly sophisticated game from the famous franchise, making Sky Force Loaded an absolute necessity. Fans of the old arcade top-down shooter will love Sky Force Reloadded. It's gorgeous, well made and explodes to play with. Anima is an action RPG (ARPG) that feels like a serious Diablo II clone, but that's not a bad thing. APG tends to be, and while it is, it looks good, so it's an incredibly addicting game. The dark fantasy setting will draw you in enough to keep you chasing the loot. I enjoy this game so much that I featured it as my first game of the week. Anima's controls are great - they are not disturbing, but easy to attack and use abilities. This is a free-to-play game with micro-transactions, but it seems to resemble an asylum routeThey are not in your face and you can play the game on your own terms. You can pay a little money to unlock three more character slots, two additional inventory tabs, and weapon upgrades. There are also other purchases, such as dungeon keys and skill reset items. Anima is a clone of Diablo, but that doesn't mean it's not a good ARPG. It's a ton of fun. Source: Google Play Store Hearthstone is the king of card games on Android and an icon of overall gaming culture. It's very popular, partly because it makes use of Blizzard's beloved Warcraft universe, so you're free to get started. It came to the scene in 2014 and took over from there. Since then, a lot of expansion packs have been released, so there's a lot of content here for new players to dive into. Hearthstone pits you against another player in a 1v1 battle where your goal is to knock down their health pool to 0 before they do the same to you. Different cards have different abilities, some of the attacks and defenses. With all the extensions, there is a lot of diversity and diversity in deck builds. This game is easy to pick up, but it is open to some wild strategies. It's fun, but the pressure to buy a new pack can be exhausting. You've probably heard of Hearthstone before and it's definitely one of the best free games around. If we're talking about my personal favorites, Gwent is at the top. This card game was born from The Witcher 3: Wild Hunt, one of the best games of the last decade. Fans of the Witcher universe probably already know Gwent, but haven't tried it yet, and if you love Sapkowski's world, Gwent is a must. Like Hearthstone, you win Gwent matches by winning two out of three rounds. You do this by having the most points when the dust settles and you score points with trump. Each card has a point value, which can be disabled or discarded by the opponent. Gwent can get pretty intense with a higher skill level. This is Gwent's full experience of cross-play. If you like the Witcher 3 mini-game, you like the extended version. It has more cards to collect (in stellar art, which I might add). Gwent is a large installation, so make sure you have enough storage and bandwidth before downloading. Gwent is a fun, free card game set in the Witcher universe. Win the best two out of three to win. Rounding out our themed card game for this list is the equivalent of The Legend of Lune terra, League of Legends Hearthstone. It's as much as a Warcraft opponent, but the Legend of Renétella has some tricks up its sleeve. First, if you're a big league fan, this could be the card game of your choice. Secondly, the gameplay is slightly different. Yes, you are still fighting to deplete your opponent's health pool before they crush you and you play cards with different attributes like attack and defense. However, each round displays an attack and defense section. If you want to attack,A chance to protect yourself from your onslaught. The person who wins in that case depends on the play made up to that point. Otherwise, it feels very similar to Hearthstone and that's fine. As I said, if League of Legends is more your jam than Warcraft, if you're in the Hearthstone formula, try the legend of Lunetera. The legendary Runetera is a League of Legends that corresponds to Warcraft's Hearthstone. It is equally over-top and sports a similar formula. Sending is completely free without hooks, caveats, or anything else we've been accustomed to lately. It is honest to a good puzzle game that challenges the mind, teaches you new concepts (unless you are a network engineer), and makes you atmosphere relaxation. Transmission focuses on creating connections that allow communication over the network. Sounds geeky, but I assure you, this game is perfect for everyone. Each level is a different network consisting of 6 different types throughout and the game gently rises to difficulty until you create some really epic connections. The sense of achievement in this game is great and certainly continues to keep you going, even if the next level seems impossible. Remember that you can do a lot of things through patience. I digress. Given that IAP and ads are out of sight, you can get hours and hours from the transmission. And the soundtrack, it's so good. Top it all off with gorgeous visuals and have one great game of your own. Do yourself a favor and try the transmission. I think you'll love it. Transmission is an incredible puzzle game about connecting different networks. It's beautiful, addicting and incredibly fun. Another incredibly fun game that is 100% free without nonsense. Data Wing Racing adventure through pure neon style. Even if it's you, it's perfect for 80s/retro wave fans of your life. The visual styling is certainly impressive and I love every minute I spent at Data Wing and I had to tell you all about it. Behind Data Wings is a fun story like the original Tron in several ways. This is fairly common given the visual style of the game. Touch controls are also on point and the levels are great to watch. Perhaps the data wing will end pretty fast, but it's a lot of fun to go back and start over. There is a high replay value here. Its soundtrack is pretty awesome too. I love everything about the data wing and I lack the drawbacks and caveats that I usually have to be aware of before trying it out. I wish I could do it more often, but sad? At the very least, we have an excellent game like Data Wing to float that dream. Another excellent giveaway, Data Wing is a luxury racing adventure that take obvious cues from Tron's neon scape. It's a great little game and worth playing. Chess Prode is an interesting game and is on our list because of how unique it is. Guess what this game is all about. I'll wait. Understand it?It's fun to hear. It also changes the way you play chess. If you are a chess master, you may actually be more disadvantaged than the unskilled. Viv La Revolution and all that. Anyway, Chesprode is very fun. Capturing the piece will boom the entire row or the entire column, unless there is a king along the way. This game changes the whole chess paradigm from the original game to the unrecognizable except for the pieces. Even the board can be strange (in some cases user generated). The game also throws you different challenges, multiplayer, and that level generator I just mentioned. It's a game explosion and is perfect for chess nubes and veterans as well. However, it contains an undo IAP (infinite cancellation is a one-time purchase for \$1.99). I think Chesprode has completely changed the traditional way of chess and is heading for the better. It comes with the IAP, but it's actually not that bad. Etanium is an ARPG designed from the ground up for mobile, so the touchscreen controls are great. The game is my favorite ARPG on Android, taking obvious inspiration from classics like Diablo and Torchlight and still best anima and titan quests. There are three classes to choose from. loot to discover, companions to rescue, and a world you'll see as you pursue your enemies. You can play for free, but you can play the entire game without spending a penny. You can earn premium currencies, gems or buy bundles at once, with gameplay. The ads were removed in the update a while ago, so I honestly have a good ARPG here. Experience another amazing ARPG for Android where you pursue your enemies around the world. Etanium offers a lot to do, has decent end games, and a variety of good gameplay.Source: Ubisoft Brawlhalla is such a great free-to-play platform brawler that you have Smash Bros. brawl on your phone. Access and keep tens of millions of players accessible and fun, including matchmaking (including cross-platform support), different game modes, and fun gameplay. There are 50 characters at the time of writing, and there is a rotation of 8 characters of free play every week. You can win gold to buy new ones, or you buy all legend packs to unlock all current and future characters. The game receives regular updates, has a thriving community and is probably one of the best brawlers for Android. Given Brawlhalla like Smash Bros. smash brawl for your phone, you have the gist of what it offers. It's a great game to play casually or competitively. Gen shin impact is an action RPG with great elemental combat and a fun party system. It's a gorgeous open world to explore, lots to do and take obvious cues from The Wild Breath with lots of characters to collect. It suffers from several monetization pitfalls, including a very shattered endgame, and is centered around gacha mechanics to collect new characters and items. Still, this is a game to try to experience the world.This game is a big problem right now, so try it on your phone or computer (or PS4, or you don't get cross save) and see what you think. Take the world in this excellent action RPG. Enjoy beautiful art, character models and the ability to cross-save between PC and mobile. Update December 2020: Added Brawlhalla, Eternium, and Gen new influences to our list!
